

NXTPLAY

SUSTAINABLE. PLAYABLE. RELIABLE.

ARTIFICIAL TURF'S NEXT PLAY.

NXTPlay ARTIFICIAL TURF'S NEXT PLAY.

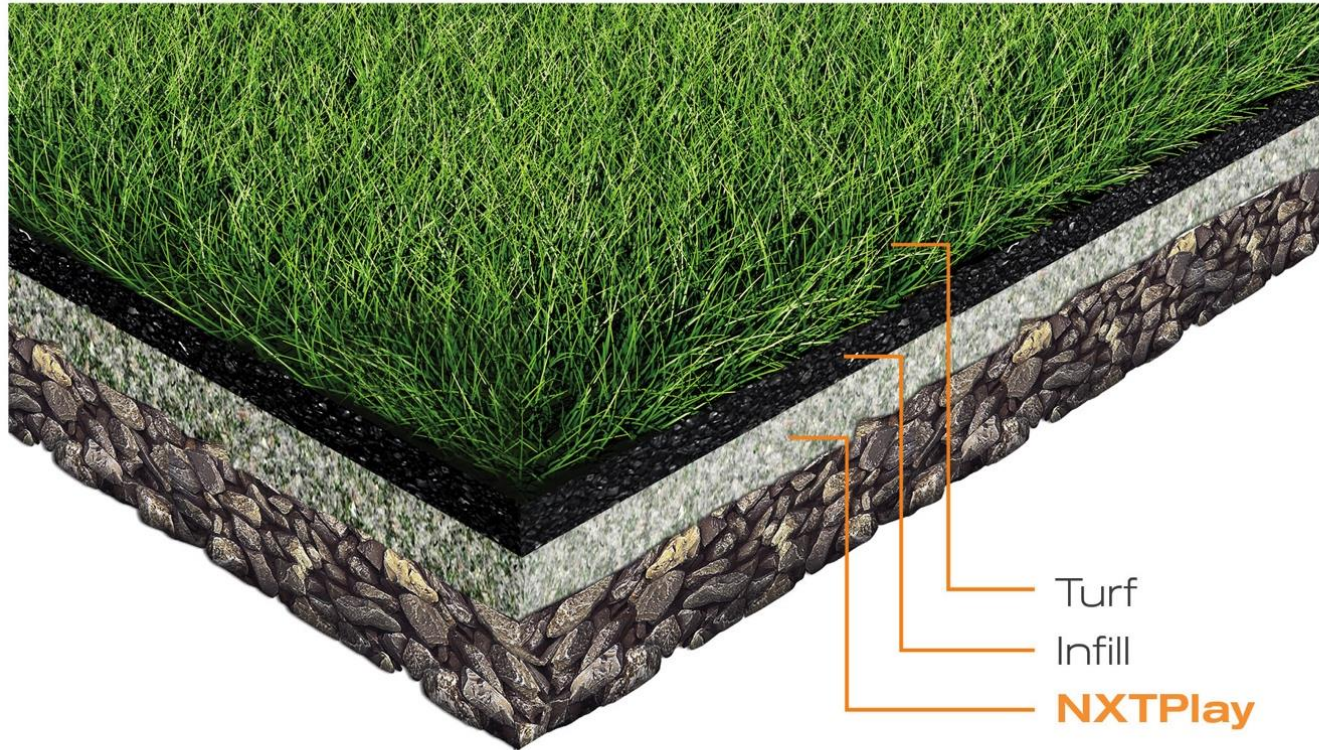

Competitive Advantage:

Superior performance through sustainability. The NXTPlay performance shock pad is a creative solution for an artificial turf field at the end of its useful life. We are recycling these old playing surfaces and transforming them into an innovative, high-quality product and environmental value.

NXTPlay delivers excellent playability, exceptional safety and results in the diversion of used turf from landfills.

NXTPlay

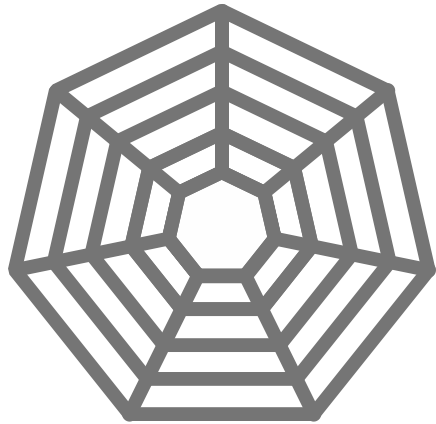

ARTIFICIAL TURF'S NEXT PLAY.

1:1 One field of pad produced equals one turf field diverted from the landfill.

At Shaw Sports Turf we're creating a new life for materials that would traditionally be discarded as waste.

The patent pending, NXTPlay performance shock pad will keep used turf from finding its way to the landfill. Not only is NXTPlay a great play for the environment, it's a great play for your field.

PLAYBILITY

- Excellent performance results in all playability metrics
- Firm, natural feel underfoot
- Tailored for use with Shaw Sports Turf systems and the Playability Assessment Tool
- Natural ball-to-surface interaction and player to surface interaction
- Consistent and safe for the athlete
 - Gives athlete the freedom to focus on their craft not the playing surface

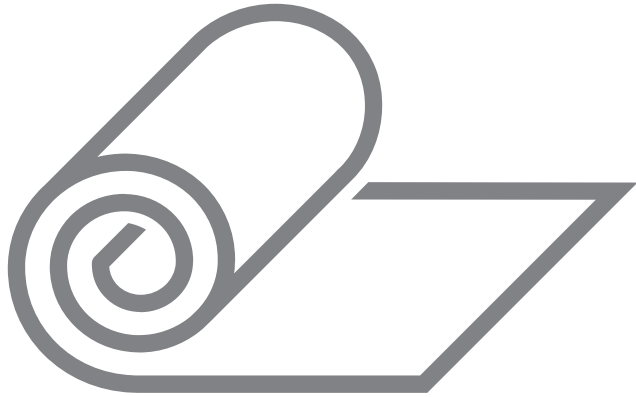

RELIABILITY

- Freeze-thaw resistant
 - In multiple cycles of freeze and thaw, no pad separation and no gaps
 - Additionally, no gaps between the pad or the turf around the perimeter where the edges are secured
- Superior drainage rate, greater than 500 in/hr
- Backed by Shaw's 25-year warranty

SUSTAINABILITY

- Turf landfill avoidance
- Made with up to 80% recycled content
- Zero water used in the manufacturing process
- Completed material health assessment
- Recycled and manufactured in the USA

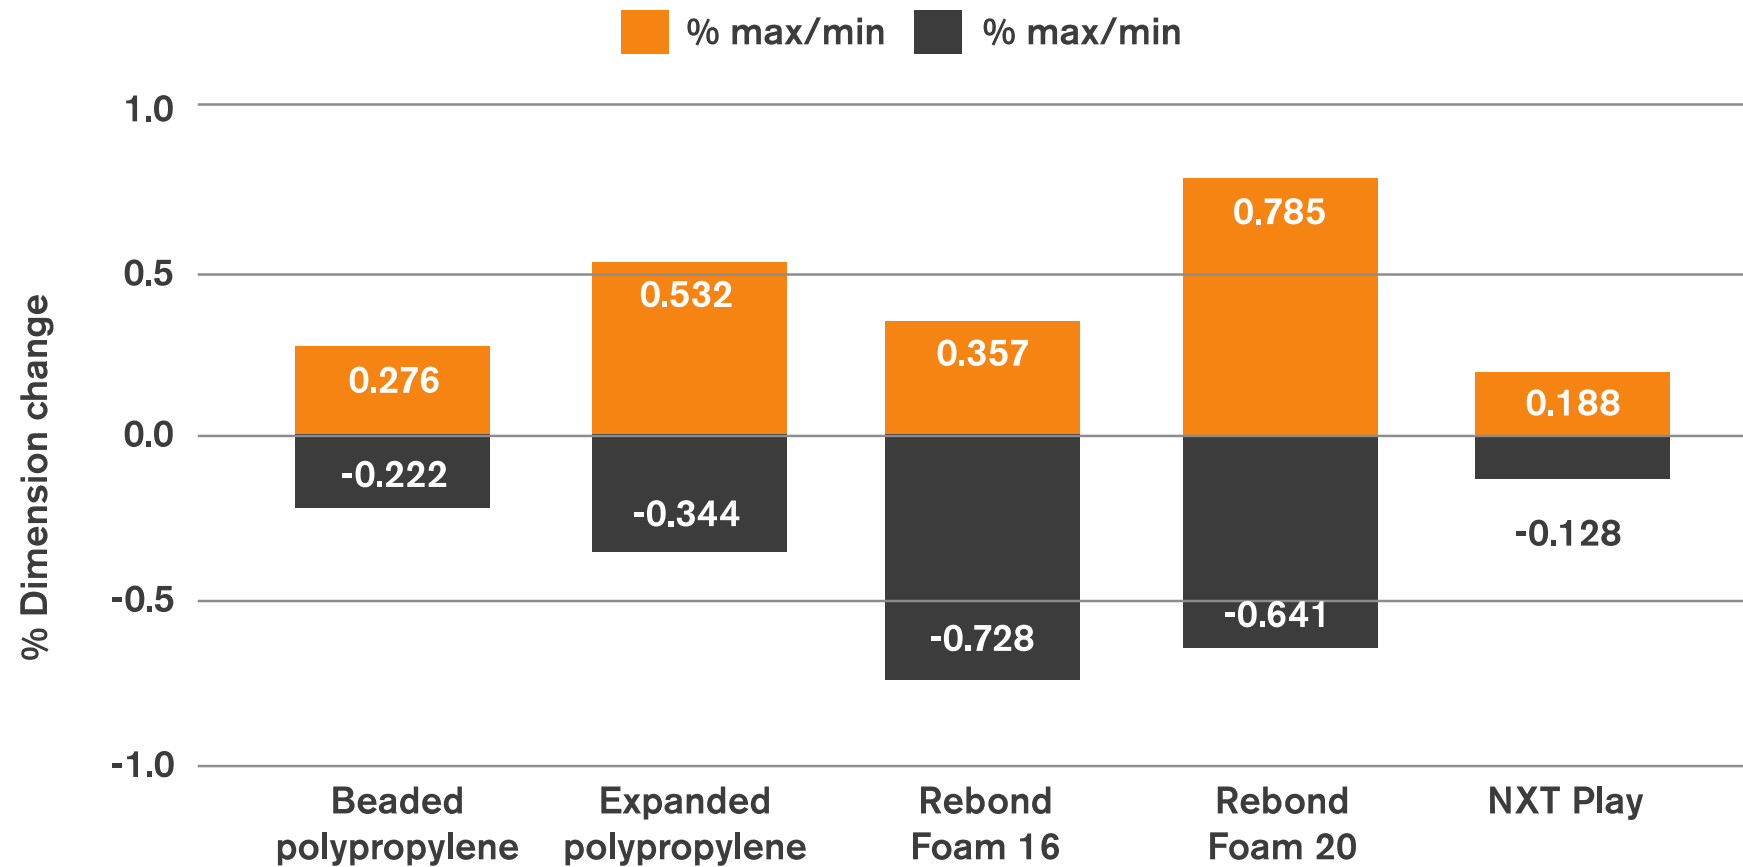

INSTALLATION

- Easy to install - larger rolls vs. smaller pieces
- Less installation hassle
 - Fewer pad seams and less edge detail mean faster installation
 - 2x faster to install compared to other underlayment products on the market
- Stable under any weather conditions
- Reduces waste material

Superior Dimensional Stability

Dimension stability of different turf pads - EN13746

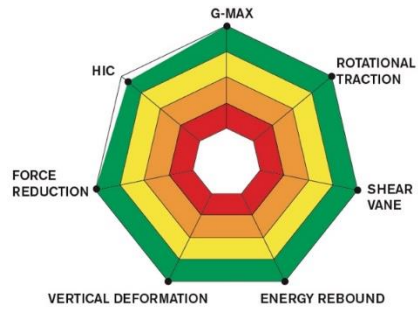

NXTPlay ARTIFICIAL TURF'S NEXT PLAY.

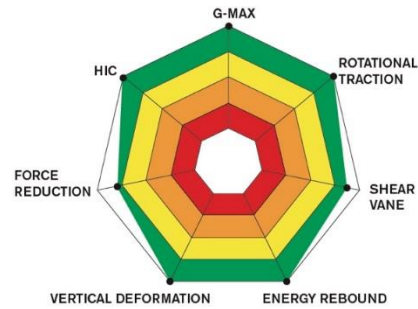

PLAYABILITY COMPARISON

As illustrated by Shaw Sports Turf's patented Playability Assessment Tool, the NXTPlay performance shock pad shows enhanced results for the system when compared to competitor underlayment products. In each of these comparison examples, the fabric and infill combinations are identical.
