Town of Sturbridge Planning Board:

The proposed island modification will reduce the one hundred and eight existing truck parking spaces by eight. The slight reduction in truck parking is not expected to impact the function of the site. It is worth noting that over the first year there have not been site concerns or issues brought to the Town Planner or Pilot's attention in regard to excess traffic or queueing and parking outside of the travel center.

While Pilot is not in a position to enforce parking requirements off the travel center property, it is Pilot's priority to provide professional drivers a space to refuel, relax, and take the mandatory rest period in our newly rebuilt Pilot Travel Center.

Thank you,
