## NARRATIVE

### Introduction

Pilot Travel Centers LLC wishes to redevelop and perform site improvements at their location at 400 Haynes Street (Rte. 15) in Sturbridge, MA. These Improvements include, but are not limited to:

- Demolition of existing Travel Center Building
- Demolition of existing Convenience Store
- Construction of new Building combining the Travel Center with the Convenience Store
- Remodeling the Truck Fueling Area
- Relocating the Passenger Vehicle Fueling Area
- Repair or replace (if necessary) the fire line and suction pump providing fire protection for the site.
- Reconfiguring the access/egress drives for trucking and passenger vehicles
- Milling and overlaying the Truck Parking Area at the rear of the site

Several of these proposed activities are subject to the rules and regulations of the Sturbridge Conservation Commission and Massachusetts Wetlands Protection Act. Many of these activities are also redevelopment or maintenance of existing site features or elements.

### Scope of Work

Renovation/Redevelopment – This project qualifies as a “Redevelopment” Project per Massachusetts Stormwater Guidelines. The project includes a reduction of more than an acre of impervious area, and there will be no new encroachment into buffers or resource areas.

Stormwater Improvements – In addition to the reduction in impervious area referenced above, this project shall result in improvements to stormwater quality; combined with reductions to stormwater runoff (from pre-construction to post-construction rates) commensurate with the reduction in impervious area. See Table Below

Design Storm	Pre - Condition	Post- Construction
2-Year	22.5 CFS	20.2 CFS
10-Year	36.5 CFS	33.2 CFS
100-Year	60.31 CFS	56.4 CFS

Reduction in Impervious Areas – Pilot has reviewed on-site areas where impervious cover can be removed and still provide operational consistency. Where impervious cover is removed, the ground surface will be planted with grass or landscaped with wildlife attractive species.

Maintenance-Replacement of Fire Line – Pilot shall perform an inspection of the fire suppression intake line from the fire pond and determine if replacement or repairs are required. Any replacement of the line will be through a flexible line set along the floor of the ponded area so as not to cause any new disturbance. At the shoreline, if new piping is required, a limited trench shall be excavated for suction line installation. Appropriate Erosion Controls shall be installed at the slope limit to protect the embankment and the waterbody. Existing surface soils and vegetated material shall be temporarily stored to be placed in the trench surface to restore the conditions existing prior to alteration.

## **Resource Areas**

Buffer Zone of Bank & BVW – Ecotec, Inc has identified the wetlands limit in the field, and a report of their fieldwork and findings is appended to this NOI. Buffer Zones shall be protected with appropriate erosion controls prior to construction and shall serve as the project limit.

Bordering Land Subject to Flooding (BLSF) – The Flood Insurance Rate Map for this area defines the 100-Year Floodplain Elevation as 669.0. The boundary of the floodplain is depicted on the Site Plans. No alteration of the BLSF is anticipated unless required to provide replacement or repairs to the fire line utility described above. In this case, surface grades shall be re-established and the surfaces stabilized to protect the interests of this resource area.

Riverfront Protection Area (RPA) – Extent of the Riverfront Area is depicted on the Site Plans. Since activities are proposed within the RPA as part of the proposed redevelopment, enhancements of the RPA to restore the function of this protective zone are included. This aspect includes restoration of natural buffer, and removal of impervious areas to provide a benefit that does not exist currently.

## **Mitigating Measures**

Erosion Controls – Siltation and Erosion Controls are planned for this project to protect the interests of the Sturbridge By-Law and the Massachusetts Wetlands Protection Act. These controls shall be in place prior to activity and shall remain in-place until such time after construction that surficial conditions have stabilized. Removal of controls shall only be with approval of the Sturbridge Conservation Commission.

Stormwater Rate Reductions – Stormwater rates shall be reduced as part of this project. Stormwater Quality enhancements shall also result from implementation of the proposed improvements. (including but not limited to; gas traps in catch basins, stormwater treatment units).
