Section 2. Basic Site and Project Information:	
A. Assessor's Parcel Identification Numbers:	
B. Please describe the proposed project:	
C. Note any special permits or variances grant	ed, denied to this location.
Note any current zoning or general bylaw non-	conformance associated with the property or the application.

APPENDIX B-1 ARCHITECTURAL REVIEW Page 2 of 8

### D. CHECKLIST OF PLANS AND MATERIALS SUBMITED WITH APPLICATION

The applicant shall submit one original set and six copies of the application and final drawings and one set of materials at the time the application is submitted to the Town Planner. A *copy* of any site plan that is

sub	pared under the Zoning Bylaws Site Plan Review process shall also be submitted. The DRC may waive site plan mittal requirements for specific projects and may substitute a site visit for some or all of the required materials. he absence of such waiver, the following materials shall be submitted at the time of the application to the DRC:
	A drawing showing the location, type, size or dimensions of existing structures on the project site, abutting properties and significant site features such as existing trees @ 4 inch caliper and larger, topography, retaining walls, walks, patios, drives, roads, parking, wetlands, and water bodies.
	Photographs showing the proposed building site and surrounding properties. Photographs should include the existing site features identified in the preceding paragraph as well as the same existing features where they exist in close proximity to the project site but on parcels immediately adjacent to the project site.
	Design plans for alterations and/or additions shall depict existing structures to be altered and their relationship to adjacent property including dimensions showing the shortest distance between the proposed structure/s and the nearest buildings on adjacent properties.
	Applicants should note that the objective is to present a complete picture to the DRC. Applicants are required to include Manufacturers' material cut-sheets.
<u>Arc</u>	hitectural Drawings shall include:
	Floor plans of all proposed building levels;
	Architectural elevations of all exteriors including the dimensioned height of the proposed building above grade at the foundation, window and door locations
	Descriptions of exterior materials, and colors including roofing, walls, doors, windows, any special features, etc.
	Facade drawings (elevations) should include all existing and proposed entrances and windows, including those slated to be removed. Elevation drawings should make explicit how the proposed work fits in with the design of the abutting properties (are windows, doors and other fenestrations, etc along the same plane, etc. See pages 10-16 of the Design Review Committee Handbook and Design Guidelines for more information for more information).
	Information on the style of doors, windows, special features or building elements (porch, balcony, shutters, etc).
<u>Site</u>	Plans shall include:
	Existing buildings and plantings
	Proposed new structures

APPENDIX B-1 ARCHITECTURAL REVIEW Page 3 of 8

	Handicapped access features
	Sidewalks, drives and parking lots shown where they exist on site and identified by type of existing paving material;
	All site objects and fixtures (Including signs and lighting)
_an	dscape Plans shall include:
	All existing buildings and site features to remain;
	Existing and proposed grading
	Paving materials. Existing pavement to remain along with proposed pavement both indicated by layout and paving materials;
	Planting plan, with descriptions of materials. Planting plan identifying the proposed plant material and quantity of each by location on plan; an overall plant list, which at a minimum identifies total quantities of each plant used botanical and common name for each plant, and size of the plant material at time of installation.
Ε.	CONFORMANCE WITH DESIGN STANDARDS
sha app	lain how each of the design standards outlined below has been addressed in the proposal. Applicants II review the 'Design Review Committee Handbook and Design Guidelines" when preparing this blication. Where specific pages within the Guidelines could be referenced to provide a starting point to blicants completing this form, those have been included. The page numbers are intended as an initiant of reference for applicants and are not meant to denote the only pages that refer to a specific item.
1.	Please explain if the height of the structure will be affected by the proposed alteration. If so, please explain how the height of this structure relates to the style and character of your structure and the buildings surrounding your property (For guidance please refer to Page 9-18 of the Design Review Committee Handbook and Design Guidelines)
2.	Please explain any changes that are proposed for the windows and doors of the structure. If changes are proposed, please explain how the windows and doors selected for your project will be compatible with the architectural style and character of the surrounding area. (For guidance please refer to Page 9-18 of the Design Review Committee Handbook and Design Guidelines)

APPENDIX B-1 ARCHITECTURAL REVIEW Page 4 of 8

The relationship of building masses and shapes to open space between it and adjoining structures shall be compatible; for example the length and width of a proposed structure should replicate the approximate length and width of neighboring buildings (See page 13-12 of the Design Review Committee Handbook and Design Guidelines for more information) please explain how your proposal accomplishes this general guideline.  If changes to the roof of your structure are proposed please explain. If changes are proposed, describ how the roof design and pitch of the structure will be compatible with the architectural style an character of the surrounding buildings. For example, the roofing material and design should be appropriate for the architectural style of your structure and should be compatible with the buildings surrounding your structure. (See page 13 of the Design Review Committee Handboo and Design Guidelines for more information).  If changes to the overall scale of the structure are proposed, please explain. If so, describe how the scale of the structure shall be compatible with the architectural style and character of the surrounding buildings. (See page 14 of the Design Review Committee Handbook and Design Guidelines for more information).	The relatio	nehin of building masses and shapes to onen space between it and adjoining

Rev	nment will occur at similar intervals as those of neighboring structures. (See page 14-16 of the Design view Committee Handbook and Design Guidelines for more information, photographs and etches that explain this concept).
7.	Signage for projects are covered within the DRC Sign application and process, however, please explain any existing and proposed signage and how the signage relates to the overall architecture of the project.
0	<b>Signs,</b> with associated architectural details, materials, colors and textures shall be compatible with the predominant architectural character of the neighborhood, while preserving and enhancing the surrounding area.
0	<b>Advertising features,</b> including size, location, design, color, texture, lighting and materials, shall not detract from the use and enjoyment of the proposed building and structures and the surrounding properties.
8.	<b>Preservation</b> of historic, traditional or significant uses, structures or architectural elements shal been preserved to the greatest extent possible during any project. Please explain the methods employed to preserve such features during the design of this project.

APPENDIX B-1 ARCHITECTURAL REVIEW Page 6 of 8

10.	shall be located to the side or rear of buildings when possible. Please describe, in detail, the landscaping that is proposed for your project. (The Design Review Committee Handbook and Design		
	Guidelines provide good information on landscaping for specific applications. The Zoning Bylaw, Chapter 25 also contains detailed information on landscaping and buffering requirements. Applicants shall review both documents prior to completing this application.)		
11.	Lighting shall be used to enhance appearance of the property, provide for safety and security of the property, and of those visiting the property. Lighting shall be shielded so that it does not cause surrounding properties and roadways to be illuminated and in all cases Dark Skies Compliant lighting is encouraged. Please describe the lighting that is proposed as part of your project (Please see Page 20-22 in the Design Review Committee Handbook and Design Guidelines for more information on lighting selection).		
	ease note: Photographs of existing site and the building can aid the DRC in making its decision.  ion F. Required Signatures:

APPENDIX B-1 ARCHITECTURAL REVIEW Page 8 of 8

# TOWN OF STURBRIDGE ARCHITECTURAL REVIEW APPLICATION DESIGN REVIEW COMMITTEE

### B. Please describe the proposed project:

Renovation & addition of senior center - increase from 9,000 GSF (including Basement) to 16,900 GSF building area (including new basement mechanical room). The site will increase from 26 parking spaces to 51 parking spaces. The existing building will be renovated, the small red siding addition on the rear (currently director office) will be removed and a new mostly single-story addition is proposed along the back of the building as to not detract from the existing building. There will now be a formal entrance with carport facing Arnold Road.

### C. Note any special permits or variances granted, denied to this location.

Parking lot is currently non-conforming within the setback. ZBA application has been submitted for the new design to increase existing non-conforming site features.

#### E. Conformance with Design Standards

- 1. The current existing building height will not be modified and is taller than the proposed addition. The style and character of the addition will be different than that of the existing building to not compete.
- 2. The existing building windows (double-hung inserts will be replaced with high-performance windows to replicate the appearance of the historic windows.
- 3. The addition is designed to create two primary outside spaces, one at the new entry, and a south-facing courtyard formed by "L" configuration of the existing and the new buildings. The west-facing entrance includes a new carport for visitor drop-off and a planted area in front of it for memorials and ornamental plants.
- 4. The current existing building roof will be modified on the rear 1998 elevator/stair addition but will remain taller than the proposed addition. The existing roof is asphalt shingle gable roof, and the addition will be the same.
- 5. The addition is designed to be secondary to the existing building in its massing. The gable profile matches the existing roof slope and is perpendicular to the existing gable at the back of the existing building. The overall building massing retains the prominence of the existing building on Main Street and steps down in height toward the neighborhood.
- 6. The addition is primarily viewed from the south (Main Street) and the west (Arnold Road). The west view features a gable end whose slope and proportion matches the gable of the existing building. The addition's ridge is lower to maintain the prominence of the original building. From Main Street, the addition is a background building to the existing building.
- 7. The existing street sign will remain, with downlighting added. The existing sign on the front of the building will be removed. A new building sign will be installed on the carport entrance area facing Arnold Road.
- 8. The existing schoolhouse building exterior is being restored.
- 10. The landscaping goals of the project are to enhance the Main Street and Arnold Road streetscapes and to provide attractive walking and seating areas for Senior Center users.

Both Main Street and Arnold Road will become tree-lined streets along the Senior Center property, as we are adding over 10 trees along the road. The trees are a mix of deciduous shade trees, large evergreen trees, and medium sized flowering trees. Several ornamental plant beds will also be added or revitalized. Low flowering shrubs, perennials, and bulbs will be added around the existing Senior Center name sign. The existing seating area on Main Street at the Snellville School monument will be revitalized with new stonedust paving, new plantings in the seating area, and new shrubs atop the stone wall to screen the new electrical pads behind the wall. The building's new carport entrance will have a brick walkway, benches, and a bird-friendly viewing garden. These additions will beautify the area and add a diverse palette of landscape plantings to the site. It will enhance the experience of motorists passing by pedestrians along the sidewalk, and the many users of the Senior Center.

The east side of the property is buffered by existing woodlands, and the north side of the property will be bounded by a 6' high vinyl fence. These will block headlights and view to the parking areas from abutting properties.

11. Exterior lighting includes dark sky compliant parking lot fixtures, bollards at building sidewalks, and soffit-mounted fixture at the carport and patio roof overhang. Photometrics are included in the drawing attachment.
