Re. 446 Main Street, Sturbridge – Beaver Maintenance

Dear Commission,

As part of the perpetual beaver maintenance condition for the above referenced site, the owner of the site proposes the items outlined on the second page of this letter. The form shall be completed by the property owner at the end of each year and submitted to the Conservation Commission by December 31st to ensure the maintenance items have been completed. Photos and trapping invoices will be attached to the submitted form, as necessary.

Respectfully,

Glenn E. Krevosky, consultant

Twice per year, in the spring and late fall (when beavers generally move), the owner will have an individual check the water level in the wetland behind the 446 Main Street building. This person will ensure the water elevation does not rise above the 577.36 elevation of the outflow. A stainless-steel pipe with cap has been placed adjacent to the outflow as a permanent marker. The cap is three feet above 577.36.

Twice per year, in the spring and fall, the owner will employ a beaver trapper. The trapper will trap beavers on the site and ensure the beaver has not constructed a dam which would raise the water level causing flooding to the adjacent property to the east.

	Date (Spring):	By:	Date (Fall):	By:
Check Water Elevation				
Employ Beaver Trapper				

Attach photos and beaver trapping invoices as necessary.
