**Action: None**

**Old Business**

1. Discussion on the "Ice Safety" article. Article needs to be in paper (Stonebridge Press-Brendon Berube editor) and Villager possibly, before winter sets in. Timeliness important.
2. There will be an interview with SLAC that hopefully will be published for mid-Winter.

3. Spring article will be on “safe use of fertilizers on lake front properties”.  
It was mentioned a “health of our lakes article” might be a good idea in the future.  
All articles will be presented to SLAC members for review before they are published.
4. Discussion followed on the amounts of Sodium found in the various lakes, especially those bordering the Mass. Pike. Chris Mazeika spoke to the conductivity test that are done on the lakes to monitor salt/mag chloride levels in the lakes. Cedar Lake and Walker pond have the highest levels of conductivity as expected due to their proximity to the Pike. Jeff Bridges mentioned that new drainage areas were being constructed by the Town to control erosion and run off water flowing into Cedar Lake.
5. Laurie and Marita are still working on the Outlook Calendar being created for events and projects at the various Lakes.

**Action: Get finished article to papers; Laurie/Marita. Finish Outlook Calendar.**

**Unfinished Action: Bruce will look into the correct distance rafts can be from shore.**
